In order to comply with the Borough of Cresskill 's Zoning Ordinance, No. 02-36-1244 (Effective 2/06/02) "Zoning" to provide for floor area ratio limitations, impervious areas and regulate the permitted size of existing or new buildings in all residential zones and to regulate nonconforming use, the applicant is required to submit the following information for Zoning Review Approval / Denial.

- I. Site layout plan showing:
 - 1. Borough easement location (dimensioned)
 - 2. Measurements from property lines to all building structures such as residence, garage, sheds, porches, decks, cabanas and building or other structures with roofed areas (BUILDING COVERAGE)
 - 3. Show all IMPERVIOUS AREAS such as but not limited to:
 - a. Building coverage
 - b. Driveways or other paved areas, including paving stones
 - c. Patios and walkways
 - d. Tennis Courts
 - e. Decks, which do not allow free drainage of rainwater through to the ground underneath.
 - f. Pad for exterior ground mounted H.V.A.C. etc.

II. List each impervious area in percent (%) and give square foot for each. Give total square foot and percentages of existing and proposed impervious area (separate sheet signed and sealed by the engineer). This information is to be used to complete the attached "Zoning Analysis" for a determination as to whether or not a variance is required. This analysis and potential denial is subject to Board approval. The Board may include additional variances as they deem necessary.

(AFTER REVIEW BY ZONING OFFICIAL).

The above-mentioned SITE LAYOUT PLAN is to be prepared by a New Jersey licensed engineer (surveyor). All measurements and calculations shall be certified by same.
